

## Securing Valuables are a Top Priority for Travelers

The competitive advantage of providing guest room safes demonstrates reasonable care, minimizes in-room theft and removes suspicion from staff. But, not just any safe will do the job. Poorly constructed models that lack advanced security features and detailed reporting can cost management time and money while tarnishing the property's reputation.

With 30+ years of experience and over 1.5 million global installations, Safemark is approved and specified by leading hotel brands and management companies.

Installations range from luxury to economy properties with models crafted to accommodate case goods, walls, closets, and more. A 5- year manufacturer's warranty and \$10,000 limited warranty against forced entry are included with most models.
