

Fire & Life Safety Expertise

Averus is a national provider of fire protection and life safety services, helping organizations protect their people, property, and operations while maintaining compliance with applicable fire and life safety codes. They specialize in serving multi-location businesses across healthcare, hospitality, education, retail, restaurants, and commercial facilities, delivering consistent service through a centralized account management model and digital reporting platform.

Under this program, Averus provides inspection, testing, maintenance, repair, and installation services for portable fire extinguishers, kitchen fire suppression systems, fire alarm systems, sprinkler systems, emergency and exit lighting, backflow prevention devices, and related life safety equipment. They also provide NFPA-compliant kitchen exhaust hood cleaning and grease filter exchange services to help reduce fire risk and maintain safe commercial kitchen operations.

Program Features & Benefits

- Dedicated account support & coordinated scheduling
- Detailed compliance reporting to help streamline audits
- National availability
- Averus provides inspection, testing, maintenance, repair, and replacement services for fire protection equipment from all major manufacturers.
