

Premium Cookware and Kitchenware

Made In is a premium cookware and kitchenware manufacturer built on a fourth-generation family legacy in commercial kitchen supply. We design every product to meet the exacting performance standards of the world's best chefs, and we partner with heritage factories in the U.S., France, and Italy to craft tools built to last a lifetime. Today, more than 3,000 professional kitchens worldwide rely on Made In—from Michelin-Star restaurants to high-turnover hotel groups, caterers, and volume-driven foodservice operations.

This program covers our core professional-grade product categories, including Stainless Clad cookware, Carbon Steel, Non Stick, Enameled Cast Iron, bakeware, serving pieces, knives, tabletop, and

custom-engraved items. These products are engineered for durability, heat retention, consistency, and ease of service in busy culinary environments.

Applications range from high-heat sautéing and searing to precision sauce making, institutional batch cooking, buffet service, front-of-house presentation, and chef-driven menu development. Whether outfitting a new opening, replacing aging pans, or standardizing across multiple locations, Made In offers a comprehensive, scalable solution backed by chef-tested performance and commercial reliability.

Program Features & Benefits

- Available nationwide
- Products available direct
- Ethically made in the US with high-quality materials built to last
- Reduced plastic packaging and lower-emission shipping practices
- This program is open to all channels
- Offers limited sampling on a case-by-case basis to support product trials and menu integration where appropriate
