## YOUR J FARE One Platform For All Your Online Orders

Your Fare has an out of the box solution that consolidates all your online orders to one simple user friendly platform through our Tablet Application and Restaurant Portal.

#### **STREAMLINE YOUR ONLINE ORDERING**

Our tools help restaurants focus on a full circled approach to their online ordering strategy. The online ordering space is changing daily and it is tough to navigate through all the noise. Your Fare provides all the information you need to ensure that you are partnering with the best 3rd party delivery partners for your operation.

#### THE YOUR FARE SOLUTION

Managing multiple tablet devices at the point of sale provides added stress on the entire restaurant operation. Our Tablet Application allows the restaurant to consolidate their tablets and provide a single device to receive all your online orders. Employees can receive, confirm, complete, print and search for all the orders received by the restaurant. The staff can add notes for the accountant or management staff which is uploaded to the restaurant portal in real time.

### POINT OF SALE

The holy grail for all restaurant owners is to save money on labor and reduce the number of order errors, lowering food costs. This can be achieved with a POS integration of online orders. Once we receive the API Documentation from your POS provider our team can use our API to send orders to the POS through JSON, XML or any comparable format. We build a customized integration to ensure that all order details can be received by the restaurant for accurate orders.
